VBS Total Health and Hearing Aid Battery Program

VBS Hearing Solutions have designed the first total care and hearing aid battery program with seniors and patients with healthcare concerns in mind. We aim to bring healthcare and hearing care to you, without the need to travel to and from your local emergency room, hospital, pharmacy or retailer to collect batteries for your hearing aids.

At VBS, we realize that our senior and healthcare patients need more attention so we have designed the perfect program to relieve you and your family members of worry and stress when they are unavailable. We have coordinated our services with our partners to ensure that you have what you need, when you need it, at an affordable cost.

VBS Hearing Solutions focuses on being the world-leader in free hearing testing, affordable battery packages and affordable hearing aids in the marketplace. Our network of retail pharmacies, health care clinics, health care providers, employers and insurance brokers means we can reach millions of customers in the pharmacy sector, workplace, associations and senior living communities.

TrueCare 24⁺.com

VBS has exclusive partnerships with TrueCare24, the leading 24/7 first responders, physicians and provider notifications, emergency health records and family contact support. TrueCare24 provides home visits from doctors and medical service providers. They focus on end-to-end services, including finding and arranging doctors and clinicians for home visits and follow-ups, with personal coordination between caregivers, PCP and families. VBS gives clients the healthcare they need, whether they are unable to travel, they need an emergency doctor, their family is unavailable or they simply need batteries for their hearing aids.
